Work Experience

Freelancer Programate School

Creation of a website for the automation of the selection process of the Educamás Foundation's 'programate school' program. This work was carried out by a team of full-stack developers, and I worked on the back-end.

About me

As an Industrial Engineer and Junior Full Stack Web Developer, I possess a strong passion for backend and data-driven development. While I am still in the early stages of my career, I am committed to learning and continuously improving my skills to deliver top-quality solutions for any project. I pride myself on my ability to work well in a team, achieving common goals and tackling new challenges with enthusiasm. I am excited to contribute my skills to any project and to learn from my more experienced colleagues in the process.

Education

- Industrial Engineer**
2020
Industrial University of Santander

Certificates

- Bootcamp - Developer FullStack (2023)**
MERN (MongoDB- Express Js - React Js - Node Js)
Educamás-Simplone
- Data Modeling in MongoDB (2023)**
Platzi
- Programming Skills with an emphasis on web programming (2021)**
University of Antioquia- MinTIC

Volunteer

AIESEC Bucaramanga, February-July (2021)

Team Leader of International Relations

As the Team Leader of International Relations for Incoming Global Volunteers in AIESEC, I presented the city to potential volunteers and established strong relationships with cooperations across multiple countries. This experience honed my intercultural communication, networking, and collaboration skills.
